Use Case 1: AI Powered Daily Wrap Up & Intelligent Cart Creation

User Flow for Prototype

1. Initiation
    a. The rep opens the Claude Cowork panel and runs a specific prompt or clicks a suggested skill button for "*/draft-quote:*

        Sales Rep: "Draft a quote for Morton based on our discussions over the last couple of days."

        i. Claude runs skill */draft-quote* which orchestrates the skills listed below.
        ii. Claude runs skill */summarise-product-requests* : extract product mentions and intent from Slack , Gmail and Salesforce on the conversations with contacts from Morton.
        iii. Claude runs skill */cart-management* to summarise products added to current active cart(s)
        iv. Claude then runs the skill */personalised-recommendations* to invoke the recommender, and pull up a bunch of products to be recommended for the account based on their browse/search/order history.
        v. Recommendations shown to the sales rep, and the rep decides to add a couple of the products to cart from the recommendations.

        The interactive product list widget allows the rep to select products to be added and number of each SKU to be added. He adds 3 units of Alpine Supply Slim-line Smart Dispensers and 10 units of GoBrew French Roast Whole Bean, 16 oz bag.

        Sales Rep: "Suggest a few complementary products that can be added to the quote".

        vi. Claude runs skill */quote-initiation*, and details the present state of the quote.
        vii. Claude runs skill */complementary-product-recommendations* to fetch complementary products for each product in the cart.

        The interactive product list widget allows the rep to select products to be added and number of each SKU to be added. He adds 10 units of Alpine Supply CO2 Cartridges (complementary to the Smart Dispenser).
        Sales Rep: "Add a 5% discount to the cartridges".

        viii. Claude runs skill */quote-initiation* to update the quote with all the products and the discount against the line item for cartridges.

ix. Sales Rep: (voice input) “*Create the quote. Also, text these buyers letting them know I set this up based on our chat today, and include the direct link."*

x. Claude sends out the quote to the buyer, and displays a preview of the Slack messages sent out to the contacts.
